Since 1979...

About us

Founded in 1979 by the late **Coşkun AYHAN**, Ayhan Ambalaj produces plastic packaging consumables in its modern facilities in Manisa OSB with more than 40 years of experience. By combining the strength of domestic production with the product range supported by imports, we provide fast and reliable service to all of Turkey, especially the Aegean Region, and to the world. Managed with family values, our company continues to contribute to the sector and the national economy based on stability, quality, and customer satisfaction.

With Quality and Trust

Vision

- We continue to provide solutions to our customers' changing needs by maintaining our trust-based business approach with our business partners, along with sustainable growth and competitive strength.
- Without compromising on quality, we continue to be a learning organization with a customer-focused approach based on mutual exchange of ideas.
- With the awareness of leaving a livable world for future generations, we diligently implement our environmentally conscious production approach.

Mission

- As Ayhan Ambalaj, we approach all our customers with the same quality and service understanding, regardless of scale.

Our Works;

- By increasing customer satisfaction,
- By maintaining long-term partnerships with our quality and environment-focused approach,
- By fully complying with national and international standards and legal regulations,
- We continue our work with the aim of contributing to the sector and adding value to our country.

Our Historical Journey

1979

1981

1985

1994

2000

2004

It was founded by the late **Coşkun AYHAN** at the İzmir Food Bazaar.

It grew rapidly with a reliable and principled business approach and started the production of irrigation hoses and agricultural films.

By increasing its capacity and product variety through technical innovations, it stood out in the Aegean Region.

It became a nationally recognized company with the production of shrink film and pallet covers.

In addition to its own production, it expanded its product range by acquiring the dealerships of leading brands in the sector.

After the founder's passing, the second-generation management accelerated the investments.

Our Historical Journey

2014

Ayhan Ambalaj, which designed its production facility on 15,000 square meters of open area and 2,500 square meters of closed area in the Manisa Central Organized Industrial Zone, continues its production while prioritizing its growth policy by investing in technology and people.

2018

Our company, continuing its investments, has increased its product variety by acquiring the latest technology Co-ex machine for its production line and continues to take part in the international market.

2024

With its innovative vision and ongoing investments, our company continues on its path with firm steps by expanding its product range with the latest technology **BOBST** brand printing machine and **Nordmeccanica** brand lamination machine.

Every package shaped by
quality meets with trust.

Our Environmentally Friendly Values

Eco Friendly

Recyclable Material Use

We prefer eco-friendly, recyclable, and environmentally compatible materials in all our packaging.

Energy Efficiency-Focused Production

We minimize our carbon footprint by integrating energy-saving systems into our production processes.

Waste Management and Zero Waste Approach

We implement effective strategies for waste separation, reuse, and recycling in our facilities.

Water and Resource Savings"

We develop specialized processes to minimize water consumption and ensure the sustainable use of natural resources in production.

Strong Partnerships

With our approach based on quality, trust, and sustainability, we have established long-term collaborations with many valuable business partners. Many companies from different sectors on a local and national scale trust the experience and service quality of Ayhan Ambalaj in packaging solutions.
